Introduction

The user manual for Electronic Wait List (EWL) Version 1.0, for Scheduling and Primary Care Management Module (PCMM) provides instruction in the use of the Electronic Wait List (EWL). Access to the EWL is available in four separate applications.

- The EWL Stand-Alone program
- PCMM GUI
- PCMM VistA
- Scheduling Appointment Management Module

The EWL protocols, on the Appointment Management menu, may also be added to a Patient Care Encounter (PCE) List Manager menu if desired.

Recognizing a need to effectively track the demand for services at Department of Veterans Affairs (VA) hospitals and Community Based Outpatient Clinics (CBOCs) versus their ability to meet this demand, REDACTED, then Deputy Under Secretary of Health O & M, sent a memo to REDACTED, then Deputy CIO for Health, VHA, requesting the development of an electronic wait list. Here is an excerpt from the memo dated February 1, 2002.

As you are aware, clinic-waiting times has become a high visibility issue with the Secretary's office. We report data monthly during the Deputy Secretary's Performance briefings. Current waiting time measures reflect the experience of veterans already "in the system" and do not accurately portray waiting time experiences of new enrollees or patients without a scheduled appointment. Whether due to absence of appointments or other reasons, ad hoc "waiting lists" of new veteran enrollees to be entered into the scheduling system are known to exist, and waiting times for new enrollees seeking care are anecdotally reported to be long. We will attempt to formalize an "electronic waiting list" in VistA to more consistently and accurately reflect demand across VHA, and reduce the risk to enrollees lost to follow-up due to clerical error.

The EWL assists VA Medical Centers, Community Based Outpatient Clinics, and VHA Central Office in managing veterans' access to outpatient health care. The EWL also assists clinics in identifying patients waiting for appointments and/or PCMM panel assignments.

Within the EWL stand-alone software program, a patient may be placed on a Wait List for a Primary Care team or position, a scheduling service/specialty, or a specific clinic. A patient can only be placed on a Wait List for a team or position if that team/position has met or exceeded capacity. To place a patient on a position Wait List, the patient must first be assigned a Primary Care team.

EWL software activates in the VistA Scheduling application through Appointment Management when an appointment for a clinic (set up in the Parameter file) is not available or cancelled. When utilizing the scheduling option, the user is notified prior to invoking the option if the patient is rated service connected 50% or greater. Within PCMM GUI, the EWL software activates when a Primary Care team or provider is not available to a patient. Specifically, this is when the panel is at or above capacity. Reports are available from the EWL Report option.

Sensitive Information

To avoid displaying sensitive information regarding our patients and staff, the examples in this manual contain pseudonyms or scrambled data instead of real names. Our patients and staff will be referred to as “EWLPATIENT, ONE”, “EWLPROVIDER, ONE”, or “EWLUSER, ONE.” Scrambled data is a series of random letters that replace a real name like “AAADY, JWHTRE”. Likewise real social security numbers (SSNs), real addresses and other personal identifiers are not used.

Related Manuals

The documentation for Electronic Wait List (EWL) Version 1.0 includes the following related manuals, located on the VistA Documentation Library (VDL) website.

<http://www.va.gov/vdl/application.asp?appid=131>

- EWL Installation Guide
- EWL Release Notes

Orientation

This user manual assumes that readers have a working knowledge of the PCMM GUI and VistA, VistA Scheduling, and other VistA software applications. Screen displays may vary among different sites and you may not see the data on your monitor exactly as shown in this manual. Although screens are subject to modification, the major menu options, as they appear in this manual, are fixed and are not subject to modification (except by the package developer).

Overview of the Electronic Wait List (EWL)

In the outpatient setting, patients are assigned a primary care team and provider who are responsible for delivering essential health care, coordinating all health care services, and serving as the point of access for specialty care. This is accomplished through the Primary Care Management Module (PCMM) of the Veterans Health Information Systems and Technology Architecture (VistA). When a patient cannot be assigned to a primary care team or position, the PCMM software asks if the patient should be placed on the Electronic Wait List. PCMM Wait List reports assist in the management of patients awaiting a primary care team or provider assignment.

The purpose of EWL is to provide quicker or more convenient patient care by providing care by another team or location for the patient's benefit. The EWL can be accessed through the PCMM GUI or by a Standalone Roll and Scroll application from the VistA Scheduling Appointment menu, as well as from the Scheduling Appointment Management Menu. The EWL standalone menu is accessible to users with the **SDWL MENU** security key.

The goal of the EWL is to provide care to the patient as quickly as possible. To facilitate this goal, patients may be placed on a Wait List for a different team or even at a different facility. The EWL keeps track of appointments, clinics, and providers associated with patients on the various Electronic Wait Lists. Patient eligibility information and service connected status is also recorded and updated. The EWL runs a background job to determine patient changes in the veteran's service connected percentage, service connected priority as well as changes to appointment, clinics, and personnel that affect Wait List patients. EWL also sends messages to assigned mail groups to notify of such changes.

The Electronic Wait List can also produce reports on demand regarding EWL related activities.

Important Concepts

The following sections discuss important concepts and business rules that govern the use of the Electronic Wait List. A step-by-step view of the EWL Menu is discussed in the section *Using the EWL Software*.

Inter-Facility Transfer

The EWL Inquire option checks whether an EWL entry is the subject of an Inter-Facility Transfer. If so, this information is displayed. In the Enter/Edit Wait List (Sch/PCMM) option, at the point where a new EWL entry has been requested, a look-up is performed on the Inter-Facility Transfer file (#409.36). If the patient has a transfer pending, a new prompt appears asking if a new EWL entry should be created (transferring the patient from the requesting facility). In this way, an association is made with the newly created EWL entry and the EWL entry at the requesting facility. This association is maintained until EWL entry at the receiving facility is closed.

An EWL entry cannot be edited while it is the subject of an Inter-Facility Transfer. It should be stressed that it is not possible to simply reopen an EWL entry closed due to a transfer. First, the continuation EWL entry must be removed or the connection is broken.

When an EWL entry, which is the subject of an Inter-Facility Transfer, is closed, this normally concludes the transfer. An exception to this is if the disposition reason is ENTERED IN ERROR. In this case, the status of the transfer file at the facility returns to PENDING. Otherwise, a message is returned to the requesting facility and the associated EWL entry there is closed.

Special flags indicate and track the patient's primary care transfer, rejection, and multiple team assignments. These flags work in the background and shall provide information to the Austin Automation Center (AAC) in the near future.

- INTRA TRANSFER - identifies the patient's preferred location
- REJECTION - indicates that there are locations with available Primary Care teams while the patient opted to be put on the Wait List.
- MULTI TEAM - the requested location has more than one team, and one Wait List entry was created for each team.

See detailed information in section titled Inter-facility Transfer Request.

EWL Scheduling Beyond 120 Days

Make every effort to schedule appointments at most 120 days from the “desired date”. If an appointment is scheduled more than 120 days from the desired date, the system will prompt the user to create a Wait List entry. This entry will be created with the "120 Days" flag.

The ability to use the related clinic will be allowed even if it is not set up in the SD WL CLINIC LOCATION file (#409.32). That entry will be created during this process if applicable. If the user chooses to continue with the appointment entered by answering the EWL question ‘NO’, the system will continue with the appointment making process.

The date is more than 120 days beyond the Desired Date
Add to EWL? YES// NO

APPOINTMENT MADE

If a Wait List entry is created, a message is sent to the EWL Mail Group concerning the "120 Days" flags. When viewed through Wait List – Inquiry, an entry with the 120-day flag will display a comment as shown below.

```
Subj: EWL opened entry with a 120 days flag  [#442794] 05/30/07@15:20  10 lines
From: POSTMASTER In 'IN' basket.  Page 1  *New*
```

```
-----
An open Wait List entry was created with a 120 days flag, indicating that it
was not possible to schedule an appointment for the listed clinic within
120 days of the desired date.
```

An EWL Entry was created for the following patient,

PATIENT NAME	SSN	EWL
EWLPATIENT,TWO	000020246	CECELIA'S CARDIOLOGY

Enter message action (in IN basket): Ignore//

Disposition of Matching EWL Entries

When users make an appointment, VistA searches to see if the appointment has a matching stop code in open EWL entries of the SPECIFIC CLINIC or SERVICE/SPECIALTY EWL types. If the system finds a match, an on-screen message will appear, as shown below, as well as a list of matching EWL entries. If the user selects an EWL entry from the list it will be closed. VistA automatically assigns the matching entry with the (SA)REMOVED/SCHEDULED-ASSIGNED disposition type.

If you do not want to close a particular EWL entry, pressing the 'Enter' key allows you to keep the EWL entry opened but requires you to give a non-removal reason for not closing that entry.

```

=====
Open EWL entries matching appointment specialty
-----
EW List Type   SC/P   Waiting for Institution   Orig Date   By   Des.   Date Reopen

2. CLINIC      N/F    DONNA'S CLINIC REDACTED    20 Dec 06   PAT 15 Dec 06
   Non-Removal Reason: Provider wants another appointment
Select one of the above open EWL entries to close with an appointment or press
'Enter' key to continue>: (1-2): 2

*** Patient has been removed from Wait List ***
    
```

If a matching EWL entry is not removed, the user is required to enter a non-removal reason for each matching appointment, if it has not already been entered. All open, matched entries will be displayed again when a new appointment entry occurs, including those with a previously entered non-removal reason. At this point, an EWL entry can be closed, left opened with an existing non-removal reason, or a new non-removal reason can be entered to keep the entry open.

```

Select one of EWL entries to enter a non-removal reason or press 'Enter' key to
accept the current one: : (1-1): 1

   Select one of the following:

       1          APPOINTMENT CRITERIA NOT MET
       2          PATIENT WANTS ANOTHER APPOINTMENT
       3          PROVIDER WANTS ANOTHER APPOINTMENT
       4          OTHER

Select one of the following reasons for #: 1:
    
```

NOTE: The same EWL Entry matching functionality exists when the user performs CHECK OUT on an existing appointment that was entered in the past.

Placing Patients on Multiple Wait Lists

When prompting a user for Wait List Type, the system displays all types of Wait Lists (i.e., PCMM team, PCMM position, Specific Clinic, Service/Specialty Clinic) regardless of current entries. The system displays the team associated with the PCMM position. This permits users to place patients on Wait Lists for multiple Primary Care Panels. Patients cannot be placed on the same TEAM multiple times nor can patients be assigned POSITIONS not defined to the specific TEAM. POSITION assignment can be made multiple times for the same TEAM, but the same POSITION can be assigned only one time. In addition, the display of POSITION(S) will include the TEAM associated with the POSITION for clarity.

It should also be noted that users may assign a patient to a Wait List for a specific position. However, that patient must be assigned to the appropriate TEAM prior to the position assignment.

When a Clinic Cancels an Appointment

EWL entries are synchronized with appointments by placing the patient back on the Wait List immediately whenever an appointment is cancelled by the decision of the clinic (denoted by appointment statuses C: CANCELLED BY CLINIC or A: CANCELLED BY CLINIC & AUTO-REBOOK), then interactively allowing the user to match an open Wait List entry with a rebooked appointment.

Service Connected Appointment Type

An appointment type called ‘SERVICE CONNECTED’ is used to flag and keep track of service-connected appointments. Service connected information is displayed when making an appointment. If the veteran’s service connection is 50 percent or greater, the display will look like this.

```
PATIENT'S SERVICE CONNECTION AND RATED DISABILITIES: SC Percent: 100% LEG,
AMPUTATION: LOSS KNEE ACTION (SC - 100%)
Primary Eligibility Code: SERVICE CONNECTED 50% to 100%
APPOINTMENT TYPE: SERVICE CONNECTED//
```

Notice that if the patient’s service connection is 50% or greater the default prompt for appointment type may change to ‘SERVICE CONNECTED’.

Note: If the default appointment type for this Clinic is set to ‘REGULAR’, the appointment type default will change to ‘SERVICE CONNECTED’. If the default appointment type is not set to ‘REGULAR’ (e.g., C&P, Research, etc.), the default prompt will not change, but the Appointment Type can be manually overwritten.

Service connected information is displayed when making an appointment. If the veteran’s service connection is less than 50 percent, the display will look like this.

```
PATIENT'S SERVICE CONNECTION AND RATED DISABILITIES: SC Percent: 40% Primary
Eligibility Code: SC LESS THAN 50% No Service Connected Disabilities Listed
```

If the veteran’s service connection is less than 50%, a prompt will ask if this appointment is for a service-connected condition as shown below. If you answer ‘Y’ or ‘YES’, the appointment type prompt may change to ‘SERVICE CONNECTED’.

Note: If the default appointment type for this Clinic is set to ‘REGULAR’, the appointment type default will change to ‘SERVICE CONNECTED’. If the default appointment type is not set to ‘REGULAR’ (e.g., C&P, Research, etc.), the default prompt will not change, but the Appointment Type can be manually overwritten.

```
IS THIS APPOINTMENT FOR A SERVICE CONNECTED CONDITION? (Y OR N): Y
APPOINTMENT TYPE: SERVICE CONNECTED//
```

If at Check-out (Appointment Check-in/Check-out) the provider answers the question 'Is this appointment for an SC condition' different from the answer provided by the patient and entered by the user making the appointment, the provider’s answer will take precedence and set the APPOINTMENT TYPE.

How Priority Works

The Electronic Wait List is required to track the veteran's service connected percentage of disability.

Patients with a service connected percentage of 50% or greater automatically receive a priority designation, while those patients with a service connected percentage less than 50% only receive a priority designation if their requested appointment is related to their service connected condition.

If a patient's service connected percentage changes, the following rule is applied to the patient's service connected priority: The Electronic Wait List is also required to track whether the appointment is related to a service connected disability.

In SD WAIT LIST file (# 409.3), the SERVICE CONNECTED PRIORITY field (#15) will be set to 'YES' if the SERVICE CONNECTED PERCENTAGE field (#.302) changes from less than 50% to 50% or greater. If the SERVICE CONNECTED PERCENTAGE field (#.302) changes and the SERVICE CONNECTED PRIORITY is updated, a MailMan bulletin with a subject line of "EWL SC Patient Update with SC Priority" will be sent to members of the mail group SD EWL BACKGROUND UPDATE, listing the patients' names.

Example of MailMan Bulletin

```

Subj: EWL SC Patient Update with SC Priority [#165697]
12/09/04@09:28 4 lines
From: POSTMASTER In 'IN' basket. Page 1 *New*
-----
Patient Name          SSN    OLD-EWL/SC %      NEW-EWL/SC %      PRIORITY
-----
EWLPATIENT, THREE    9999          40                 50                 YES
    
```

A MailMan bulletin with a subject line of "EWL SC Patient Update with SC Percentage Change" will be sent to members of the mail group SD EWL BACKGROUND UPDATE if the SERVICE CONNECTED PERCENTAGE (#.302) changes from 50 % or greater to less than 50%. This bulletin will also be sent to the above mail group if the SERVICE CONNECTED PERCENTAGE (#.302) is initially less than 50% and changes to a different value that is also less than 50%, but less than its initial SERVICE CONNECTED PERCENTAGE field (#.302) value. The bulletin will list the patient(s) and include an additional note, "EWL SC PRIORITY MAY REQUIRE MANUAL UPDATE PLEASE REVIEW". Each site will determine whether the SERVICE CONNECTION PRIORITY (#15) needs updating and will need to change this field manually. The new option Service Connected Wait List (Sch/PCMM) Edit [SD WAIT LIST SC PRIORITY EDIT] was created to edit the new field SERVICE CONNECTED PRIORITY (#15). This new option is not attached to any menus. The EWL coordinator at each site should determine who will be assigned this option.

Example of MailMan Bulletin

EWLPATIENT, THREE 9999 30 40 YES

Report/Inquiry

The options Appointment (Sch/PCMM) Wait List Report [SD WAIT LIST APPT REPORT] (detailed report only) and Inquire Wait List (Sch/PCMM) [SD WAIT LIST INQUIRY] display the SERVICE CONNECTED PRIORITY field (#15). During installation, the SERVICE CONNECTED PRIORITY field (#15) in the SD WAIT LIST file will be set. This field will be set to NO for current patients in this file with eligibility of SC less than 50%. Some of these patients may be on the Wait List for service-connected disabilities. It is up to the site to determine if these entries should be changed to YES. A printout of the Appointment (Sch/PCMM) Wait List Report [SD WAIT LIST APPT REPORT] (detailed only) will list all patients and display the field SERVICE CONNECTED PRIORITY.

Example of Appointment (Sch/PCMM) Wait List Report (detailed report)

Institution: VAMC REDACTED
Clinic/Service: PRIMARY CARE
EWL PATIENT, ELEVEN 9999 Desired Date: MAY 19, 2005
Primary Eligibility: SC LESS THAN 50%
Service Connected Priority: YES
Comments: THIS IS A REGULAR COMMENT
Requested by: PATIENT
Telephone (Home): 555-555-5555

ORIGINATING DATE: MAY 18, 2005
WAIT LIST TYPE: PCMM TEAM ASSIGNMENT
ORIGINATING USER: EWLSTAFF, ONE
COMMENTS: TEST
SERVICE CONNECTED PERCENTAGE: 50

Background Job

SD EWL BACKGROUND JOB

The background job performs multiple operations. The routine SDWLQSC runs in the background as scheduled by the site to determine the following.

1) The SD EWL BACKGROUND JOB opens a closed EWL entry if the appointment cancellation was the clinic's decision. The background job has been modified to remove the cancelled appointment data from the opened EWL entry to prevent that entry from being reopened if it is closed again with the same disposition code: SA: REMOVED/SCHEDULED-ASSIGNED.

A MailMan message is sent to recipients in the SD EWL BACKGROUND UPDATE mail group indicating that EWL entries were opened because of cancelled appointments with a listing of the patients, clinics, and date/times when the cancelled appointments had been scheduled. Each e-mail message may contain one or more appointments depending on the options and actions used to cancel appointments. Every cancelled appointment that results in opening an EWL entry will appear in a message, including EWL entries optionally closed by rebooking the appointment immediately after cancelling.

2) The SD EWL BACKGROUND JOB includes a search for potential matching appointments and/or encounters created for the same clinic or specialty as open EWL entries. The matching appointments/encounters would have to have their date/time not older than the Origination Date of the related open EWL entries. If the matching encounters are identified as described above, a message is sent to the mail group SD EWL BACKGROUND UPDATE, with a listing of those opened entries that should potentially be closed. These messages will include the patient's SSN.

3) The SD EWL BACKGROUND JOB determines changes in the veteran's service connected percentage and service connected priority. The business rules for this process are described in the Business Rules Tables for the SD EWL BACKGROUND UPDATE. Two messages have been created; Message 1 titled EWL SC Patient Update with SC Priority and Message 2 titled EWL SC Patient Update with SC Percentage Change. The appropriate message will then be sent to the user group. Message 1 will report that the SERVICE CONNECTED PRIORITY has been changed and both the old and new service connected percentage will be printed on the message. Message 2 will indicate that a manual review will be required and no updates to the EWL record will occur.

Important Concepts

Example of messages

Message 1 (EWL SC Patient Update with SC Priority)

```
Subj: EWL SC Patient Update with SC Priority [#165697] 12/09/04@09:28 4 lines

Using the EWL Software

The following instructions and examples assume that the user is beginning at the Scheduling Appointment menu. All user actions appear in **bold** print. You must press **<RETURN>** after you have chosen each option.

Electronic Wait List Standalone Menu

The Electronic Wait List (EWL) menu option appears on the Scheduling Appointment menu. The EWL standalone menu is accessible to users with the **SDWL MENU** security key. If the Wait List options at your site are not functioning, they may be blocked locally. If this is the case, please contact your local ADPAC or IRM.

The **SDWL Parameter** security key provides for entering and editing Specific Clinics and Service/Specialties that use the EWL at each facility.

NOTE: All Clinics and Service/Specialties that will use EWL must be setup in the Scheduling application prior to use by EWL. Designate institutions for Service/Specialties PRIOR to utilizing the Import Tool.

Active clinic division/institution assignments can be reviewed by running the FileMan sort/print template provided below.

FileMan Sort & Print Templates:

Select OPTION: PRINT FILE ENTRIES

```
OUTPUT FROM WHAT FILE: HOSPITAL LOCATION//
SORT BY: NAME// TYPE="CLINIC"
  WITHIN TYPE="CLINIC", SORT BY: INACTIVATE DATE=""
  WITHIN INACTIVATE DATE="", SORT BY: NAME
  START WITH NAME: FIRST//
    WITHIN NAME, SORT BY:
STORE IN 'SORT' TEMPLATE:
FIRST PRINT FIELD: NAME
THEN PRINT FIELD: DIVISION
THEN PRINT FIELD: INSTITUTION
THEN PRINT FIELD:
Heading (S/C): HOSPITAL LOCATION LIST Replace
STORE PRINT LOGIC IN TEMPLATE:
START AT PAGE: 1// DEVICE: <select device>
```

HOSPITAL LOCATION LIST NAME	DIVISION	INSTITUTION
OBSERVATION	REDACTED	VAMC REDACTED
OPC RADIOLOGY	REDACTED	VAMC REDACTED
ORTHO-CLINIC	REDACTED	VAMC REDACTED
OUTPATIENT LAB	REDACTED	VAMC REDACTED
PAT GM/SURG	REDACTED	VAMC REDACTED
PAT MH/NURS	REDACTED	(****missing institution****)

NOTE: If the institution field is blank, FileMan Enter/Edit must be utilized to enter the appropriate institution from the national institution file. Service/Specialties can be assigned an institution by utilizing the Wait List Parameter Enter/Edit option. The institution field points to the national institution file. If the site’s divisions are not entered in the national institution file, they need to be in order to be used with EWL.

FileMan Enter/Edit Example

```
Select OPTION: ENTER OR EDIT FILE ENTRIES
INPUT TO WHAT FILE: HOSPITAL LOCATION//

EDIT WHICH FIELD: ALL// INSTITUTION
THEN EDIT FIELD:
```

The SDWL keys DO NOT block the following three prompts in the Scheduling software. Each site must decide on use of the Wait List software at their site and implement the decision(s) through site-specific procedures and training. These decisions are particularly important to consider during the time of installation and local wait list cutover. These are the three prompts, within the Scheduling routines, that require site-specific procedures and training to implement successfully.

1. In the **Make Appointment option**, if a date and time are not entered for a clinic appointment the question is displayed, “Do you want to add this patient to the Wait List? NO//. No is the default answer. For users instructed not to use the EWL, a recommendation is to train them to always accept the “No” default. Only clinics set up in the Parameter file triggers this Wait List prompt. If a clinic appointment is made for a patient who is on the Wait List, the user is asked if they would like to remove the patient from the Wait List for that clinic. The default is yes but the response may be No and a reason given.
2. If an **Unscheduled Visit** is entered for a patient who is on the EWL for the same clinic, the user sees a prompt asking if the patient should be removed from the EWL for that clinic. Yes or No may be entered. Entering No requires entry of a reason code. The question only occurs for clinics set up in the EWL Parameter file.

3. When **canceling an appointment for a patient**, if there are entries for this patient on the Wait List for that clinic/service specialty, the user sees a message on the screen "There are Wait List entries waiting for an Appointment for this patient in (Name of) Clinic." This message could be used to prompt users to notify authorized staff about needed appointments. The prompt only occurs for clinics set up in the EWL Parameter file.

An institution must be entered for all Clinics and Service/Specialties that use EWL. Active clinic institution assignments can be verified by running a FileMan inquiry to the HOSPITAL LOCATION file (#44).

The EWL menu provides the following functionality.

1. Enter a patient on the EWL and assign the patient an EWL TYPE of the following.
 - Specific clinic
 - Scheduling service/specialty
 - Primary care team
 - Primary care position
2. Edit the EWL entry.
3. Inquire to a patient's EWL entries.
4. Disposition the EWL entry
5. Produce reports in both summary and detail format.
6. Allow the setting of local parameters for clinics and service/specialties by institution.

For the purposes of this user manual, we explain each of the above options in the order that they appear to the user on the screen with the exception of the **Wait List (Sch/PCMM) Parameter Enter/Edit** option, which because of its importance is explained first. This is how the menu appears to the user. The **Wait List (Sch/PCMM) Menu** option is found within the **Appointment Menu**.

Select Scheduling Manager's Menu Option: Appointment Menu

```

AM      Appointment Management
CK      Appointment Check-in/Check-out
WL      Wait List (Sch/PCMM) Menu ...
        Add/Edit Stop Codes
        Append Ancillary Test to Appt.
        Cancel Appointment
        Chart Request
        Check-in/Unsched. Visit
        Computer Generated Menu ...
        Delete Ancillary Test for Appt.
        Discharge from Clinic
        Display Appointments
        Edit Clinic Enrollment Data
        Enrollment Review Date Entry
        Find Next Available Appointment
        Make Appointment
        Multiple Appointment Booking
        Multiple Clinic Display/Book
        No-Shows
  
```

Using the EWL Software

Select Appointment Menu Option: WL Wait List (Sch/PCMM) Menu

- 1 Inquire Wait List (Sch/PCMM)
- 2 Enter/Edit Wait List (Sch/PCMM)
- 3 Disposition Wait List (Sch/PCMM) Entry
- 4 Wait List (Sch/PCMM) Reports ...
- 5 Wait List (Sch/PCMM) Parameter Enter/Edit

Select Wait List (Sch/PCMM) Menu Option:

Wait List Parameter Enter/Edit (Sch/PCMM)

Users assigned the SDWL Parameter key are able to set the parameters for their Wait List functionality. By setting parameters, the user can determine which service/specialties and clinic locations by institution are available for Wait List entry.

NOTE: Specific Clinics and Service/Specialties must be set up for each Institution/Division before Importing Wait List entries with the Import Tool and/or using the EWL.

Select Wait List (Sch/PCMM) Menu Option: **Wait List (Sch/PCMM) Parameter Enter/Edit**

Wait List Parameter Enter/Edit

Select one of the following:

1. Wait List Service/Specialty (409.31)
2. Wait List Clinic Location (409.32)

When setting parameters for a service/specialty, the user chooses from a list of DSS identifiers from the CLINIC STOP file (#40.7).

Enter response: 1 Wait List Service/Specialty File

Select DSS ID: ?

Do you want the entire CLINIC STOP List? Y (Yes)

Choose from:

ACTIVE DUTY SEX TRAUMA 524
 AMB SURGERY EVAL BY NON-MD 416
 AMPUTATION CLINIC 418

Select DSS ID: 418 AMPUTATION CLINIC 418

Once the user has selected the DSS identifier, the user chooses from a list of institutions in file (#4) that are associated with that particular identifier. The user is asked for the institution for the particular service/specialty that is being activated.

Select INSTITUTION: ?

You may enter a new INSTITUTION, if you wish

Using the EWL Software

Answer with INSTITUTION NAME, or STATUS, or STATION NUMBER, or OFFICIAL VA NAME, or CURRENT LOCATION, or NAME (CHANGED FROM)
Do you want the entire 304-Entry INSTITUTION List? y (Yes)

ANN ARBOR, MI	506
ASHEVILLE, NC	637
BALTIMORE, MD	512
BALTIMORE MD -	313
BATAVIA, NY	513
BATH, NY	514
BATTLE CREEK, MI	515
BAY PINES, FL	516
ATLANTA, GA	508
ATLANTA- GA	316
AUGUSTA, GA	509
AUSTIN. TX	200

Select INSTITUTION: BAY PINES, FL 516
Are you adding 'BAY PINES, FL' as a new INSTITUTION (the 1ST for this SD WL SERVICE/SPECIALTY)? No// Y (Yes)

The user then chooses an activation date for the service/specialty.

DATE ACTIVATED: **T (AUG 22, 2002)**

The inactivation date is used when the service/specialty is no longer needed for Wait List purposes.

DATE INACTIVATED: **RETURN**

The clinics are set up in option SET UP A CLINIC with the Medical Center Division pointing to the Institution in the national Institution file. Periodically, the Chief Business Office sends out a directive and the sites are responsible for maintaining the Medical Center Division file. There is a one to one relationship between a Medical Center Division and an Institution. Each Institution should have the Station Number field (# 99) assigned.

Wait List Parameter Enter/Edit

Select one of the following:

1. Wait List Service/Specialty (409.31)
2. Wait List Clinic Location (409.32)

Enter response: 2 Wait List Clinic Location

Select Clinic: ?

Answer with HOSPITAL LOCATION NUMBER, or NAME, or ABBREVIATION, or TEAM

Do you want the entire HOSPITAL LOCATION List? y (Yes)

Choose from:

50	HAYNES UROLOGY	-CHEYENNE VAMROC
51	OUTPT NURSE BLUE TEAM	-CHEYENNE VAMROC
57	GIBBENS ENT	-CHEYENNE VAMROC
66	MHC JOHNSON	-CHEYENNE VAMROC
87	NUCLEAR MED	-CHEYENNE VAMROC

Select Clinic: NUCLEAR MED -CHEYENNE VAMROC

DATE ACTIVATED: T (AUG 22, 2002)

The inactivation date is entered when the clinic is no longer needed for Wait List purposes. Inactivation of a clinic is prevented if there are open EWL entries for that clinic in the SD WAIT LIST file (#409.3).

DATE INACTIVATED: <RETURN>

Inquire Wait List (Sch/PCMM)

The **Inquire Wait List** option allows a user to view Wait List entries for a patient. Once the user has entered the patient's name, the user is asked if they want to view **“only the open wait lists?”** If the user accepts the prompt **YES**, only the Wait List entries that are open at that time are displayed. An open Wait List entry is one that has not had a disposition reason entered. If the user chooses **“no”** {meaning the user wants to see OPEN and CLOSED dispositioned entries} the user is asked for a date range. The Wait List entries for the noted time period are displayed. To best illustrate this option, choose to view only open Wait List entries and then all Wait List entries as shown below.

Select Wait List (Sch/PCMM) Menu Option:

```
1 Inquire Wait List (Sch/PCMM)
2 Enter/Edit Wait List(Sch/PCMM)
3 Disposition Wait List (Sch/PCMM) Entry
4 Wait List (Sch/PCMM) Reports ...
5 Wait List (Sch/PCMM) Parameter Enter/Edit
```

Select Wait List (Sch/PCMM) Menu: Inquire Wait List (Sch/PCMM)

Example of open Wait List entries for a patient

 Dispositioned by - EWLSTAFF, ONE

NOTE: The closed or inactive EWL entries have the “Disposition,” “Disposition Date,” and the “Dispositioned by” fields displayed.

Enter/Edit Wait List

This option allows users to add patients to a PCMM Team or position, specific clinic or a Service/Section Wait List, or to edit their entries on a Wait List. If the patient is already on a Wait List, a listing of all the current Wait List entries for the patient is displayed. This listing contains the Wait List type, the Wait List modifier (waiting for field,) institution, and date the patient was entered on the Wait List. The user is then asked if they would like to put the patient on a new Wait List or to edit the existing Wait List information. Patients with a date of death are not allowed to have a Wait List entry assigned. The user receives a message that a date of death has been recorded for this patient.

If a clinic's DIVISION field (#3.5) is changed in the HOSPITAL LOCATION file (#44), the corresponding INSTITUTION fields (#2,#.02) in EWL files SD WL CLINIC LOCATION (#409.32) and SD WAIT LIST (#409.3) must be updated as described below.

The institution is determined from a clinic entry in the Hospital Location file (#44):

```
DIVISION field (#3.5) --> MEDICAL CENTER DIVISION file (#40.8) -->
INSTITUTION FILE POINTER field (#.07) --> INSTITUTION file (#4)
```

That path is not automatic and is primarily made necessary when a division is entered in the HOSPITAL LOCATION file (#44) in error. Each time a division correction takes place, the SD Wait List Cleanup [SD WAIT LIST CLEANUP] option must be run to update the SD WL CLINIC LOCATION file (#409.32) and the SD WAIT LIST file (#409.3).

Examples of PCMM Team Wait List entry

Select Appointment Menu Option: **WL Wait List (Sch/PCMM) Menu**

- 1 Inquire Wait List (Sch/PCMM)
- 2 Enter/Edit Wait List(Sch/PCMM)
- 3 Disposition Wait List (Sch/PCMM) Entry

- 10 FORT COLLINS TEAM

Select Team: **10 FORT COLLINS TEAM**

...OK? **Yes// (Yes)**

(Note: Only PCMM Teams that are at or above their panel capacity are displayed for selection in the Wait List. Therefore, if all Teams are below capacity, no teams are display in the Wait List. If teams are not at capacity, patients should not be placed on the Wait List for them.)

Comments: **Patient is requesting assignment to PC team.**

*** Patient has been added to Wait List ***

Examples of SERVICE/SPECIALTY Wait List entry where a patient is already on a Wait List

If the patient is being placed onto a Wait List for Service/Specialty or a Specific Clinic, the user needs to select an institution, then the service/specialty or clinic. S/he then selects the priority of the appointment choosing between Future and ASAP, for as soon as possible appointments. If the user chooses Future, a desired appointment date is requested. If the user chooses ASAP, the current date is logged into the "Desired Date" field. After either choice, the user chooses whether the provider or the patient made the request. If the user chooses provider, s/he selects a provider name. The user may provide comments. The patient is then be added to the Wait List.

Select Appointment Menu Option: **WL Wait List (Sch/PCMM) Menu**

Disposition Wait List (Sch/PCMM) Entry

This option allows users to disposition or remove a patient from a Wait List. After selecting a patient, a list of the patient's Wait List entries appears. Enter the number of the Wait List entry to be dispositioned.

Using the SD WAIT LIST DISPOSITION option allows a patient's Wait List entry for a Specific Clinic to be moved to a different clinic even if it involves a different Institution. The original entry is closed with the new disposition code of *CL* for Changed Clinic.

Note:

- 1. A patient's EWL entries are automatically dispositioned with the disposition reason D – DEATH when a date of death is entered.**
- 2. Within the new EWL Scheduling routines, make appointment and unscheduled visit, EWL entries may be dispositioned.**

Select Wait List (Sch/PCMM) Menu Option:

- 1 Inquire Wait List (Sch/PCMM)
- 2 Enter/Edit Wait List(Sch/PCMM)
- 3 Disposition Wait List (Sch/PCMM) Entry
- 4 Wait List (Sch/PCMM) Reports ...
- 5 Wait List (Sch/PCMM) Parameter Enter/Edit

Select Wait List (Sch/PCMM) Menu Option: Disposition Wait List (Sch/PCMM) Entry

Wait List -Disposition Patient

Select PATIENT NAME: EWLPAIENT, FIVE 10-10-38 666102410 NO NSC VETERAN

Patient Currently is on Waiting List for the Following

#	Wait List Type	P	Waiting	Institution	Status	Date	For	Entered
1.	SPECIFIC CLINI	F	AUDIOLOGY	VAMC ALB			O	092302
2.	SPECIFIC CLINI	F	AUDIOLOGY	VAMC ALB			O	092302
3.	SERVICE/SPECIA	A	PRIMARY CARE/MEDICI	VAMC ALB			O	092302

Select Wait List (1-3) or '^' to Quit? **2**

Disposition Reason:

D DEATH
NC REMOVED/NON-VA CARE
SA REMOVED/SCHEDULED-ASSIGNED
CC REMOVED/VA CONTRACT CARE
NN REMOVED/NO LONGER NECESSARY
CL CLINIC CHANGE
ER ENTERED IN ERROR

Enter response: **SA** REMOVED/SCHEDULED-ASSIGNED
*** Patient has been removed from Wait List. ***

The option SD WAIT LIST DISPOSITION ENTRY from the Appointment Management menu allows appointments matching the same specialty/stop code to be associated if the disposition code SA: REMOVED /SCHEDULED-ASSIGNED has been selected.

Wait List (Sch/PCMM) Reports

These Sample Reports were run on a test account with limited and spurious data.

Electronic Wait List allows the creation of several types of reports. These reports allow the customization of sort criteria (sort by institution, desired date range, Wait List assignment, and priority).

Select Wait List (Sch/PCMM) Reports Option: ?

- 1 Appointment (Sch/PCMM) Wait List Report
- 2 PCMM Team/Position Wait List (Sch/PCMM) Report

EWL Wait Time Statistics

This report provides statistical information regarding Wait List times. Users may examine EWL Patient Wait Time by 'SCHEDULED DATE OF APPT'.

This is a 132 column report that is too wide for this page. See the sample report in Appendix B.

Ad Hoc Report V1

AD HOC Custom Report Version 1 allows the user to build Print Templates which can be saved and reused. The user selects the print criteria and selects the fields that will be printed on the report. The user is required to have FileMan access to the SD Wait List file in order to use this report.

Ad Hoc Report V2

AD HOC Custom Report Version 2 is a basic FileMan Search, and allows users to create Sort Templates and Print Templates for reports which can be saved and reused. The user is required to have FileMan access to the SD Wait List file in order to use this report. The user can specify the Wait List Fields and conditions that apply to the search. Search logic can also be added using AD HOC Custom Report Version 2. The user will need to be familiar with FileMan to use all the features of this report. The EWL information in SD WAIT LIST file (#409.3) as well as information in other files, such as patient demographics can be accessed.

Select Wait List (Sch/PCMM) Reports Option: 12 Ad Hoc Report V2

Print Report for ALL dates? ? Yes// (Yes)

DEVICE: HOME//

SD Wait List Cleanup

Only open EWL entries are evaluated by the SD Wait List Cleanup [SD WAIT LIST CLEANUP] option and the user is prompted for their correction if applicable.

This option allows users to update the INSTITUTION fields (#.02, #2) in the SD WL CLINIC LOCATION file (#409.32) and the SD WAIT LIST file (#409.3) if a clinic's DIVISION field (#3.5) is changed in the HOSPITAL LOCATION file (#44). Updating is done automatically where possible whenever the SD Wait List Cleanup is run. The option also generates lists of data problems and some editing features are built in.

SD Wait List Cleanup [WAIT LIST CLEANUP] must be run any time corrections are made to the Hospital Location file (#44) entry's DIVISION or to an INSTITUTION FILE POINTER in the MEDICAL CENTER DIVISION file (#40.8).

This option verifies that the entries in the files listed below are pointing to national institutions that are active treating facilities. If an entry in any of the files listed below has an institution that does not have a 'National' status or is not an active treating facility, then the entry will be available for interactive editing to replace a bad institution with a good one. The files verified are:

- TEAM (#404.51) – this file belongs to the PCMM application but contains data that affects EWL
- TEAM POSITION (#404.57) – this file belongs to the PCMM application but contains data that affects EWL
- SD WL SERVICE/SPECIALTY (#409.31)
- When evaluating EWL entries for the Wait List Key Field 'NULL' listing this report does not evaluate any incomplete entries without the CURRENT STATUS field (#23) of the SD WAIT LIST file (# 409.3) being populated. Those entries with 'NULL' in the CURRENT STATUS field are closed by this report with code ER: ENTERED IN ERROR filed in the DISPOSITION field (#21) if their ORIGINATING DATE field (#1) is before the current computer date. That condition was included not to interfere with any process of partial EWL entry on the same date when that report is generated. Those incomplete entries might have been created when there was a physical disconnection of the user's workstation during the EWL entry process.
- All closed EWL entries are eliminated from evaluation of any 'NULL' values in their required fields, and are not listed at all.

The SD WAIT LIST file (#409.3) is checked for null fields found in open EWL entries that must be manually corrected individually. The entries with missing data are displayed/printed and are available for editing. In some instances, if an entry, due to a missing field, is not available for editing in the Enter/Edit Wait List (Sch/PCMM) [SD WAIT LIST ENTER/EDIT] option, it would have to be corrected in FileMan.

Electronic Wait List via Scheduling Appointment Management Menu

Users can place patients on a Wait List during the make appointment process. This action can take place because a specific clinic or service/specialty does not have an open appointment or if a user chooses not to schedule an appointment. The user also has three additional list manager options for evoking the EWL functionality within the Appointment menu. The **(WE) Wait List Entry** option evokes the EWL Enter/Edit Wait List entry option (locked with SDWL MENU.) The **(DL) Wait List Display** option evokes the EWL Inquire Wait List option. The **(WD) Wait List Disposition** option evokes the EWL Disposition Wait List entry option (locked with SDWL MENU.) When choosing one of these options, the user goes through the same prompts, as they would in the EWL standalone menu. When these options are added to a local site's Appointment Management menu, List Manager places the options where space is available. In some cases, options may not appear as they do in the examples found below or may not be immediately viewable. If changes are desired in the menu, the sites need to make those changes locally.

Note. If a user makes an appointment in a clinic for which the patient is waiting, a prompt displays asking if the EWL entry should be dispositioned.

Example of VistA Primary Care Position Wait List entry

Select Appointment Menu Option: Primary Care Team/Posn Assign or Unassign

Prior to using this option, PCMM's Graphical User Interface (GUI) must
 be used to:

- 1) Setup active primary care team(s)
- 2) Setup active PC Practitioner position(s)
- 3) Setup any necessary preceptor/precepted relationships
- 4) Assign practitioner to position(s)

A patient can only have one PC team and one PC Position assignment on a given day. The
 patient must be assigned to a position's team to be assigned to the position.

Note: You must use the PCMM GUI if the patient was:
 unassigned from PC assignment today or in the future
 assigned to a future PC assignment.

Select PATIENT NAME: TEST, PATIENT A 10-1-43 332221212 YES
 SC VETERAN BLUE TEAM

Checking PC Team and Position Status...
 Primary Care Team: BLUE TEAM
 Select one of the following:

- 1 POSITION ASSIGNMENT -BY PRACTITIONER NAME
- 2 POSITION ASSIGNMENT -BY POSITION NAME
- 3 TEAM UNASSIGNMENT

Enter response: 2 POSITION ASSIGNMENT -BY POSITION NAME
 About to Assign TEST, PATIENT A to PC Position Assignment
 Position's Name: BLUE TEAM EWLPROVIDER, SIX 5TH FLOOR
 Assignment date: TODAY// (SEP 23, 2002)
 This assignment will reach or exceed the maximum set for this position.

Currently assigned: 3

Maximum set for position: 2 Do you wish to place the patient on the wait list
 (Yes/No)?? NO// YES (If the user answers no to this question s/he are asked if they
 would like to continuing assigning the patient to a PCMM position. See example below.)
 COMMENTS: Wants to be assigned to S. McDermott
 Patient Placed on Wait List
 Position Assignment NOT made.

Example of a user choosing to assign the patient in this prompt:
 Do you wish to place the patient on the wait list (Yes/No)?? NO//
 Do you wish to continue with the assignment (Yes/No)?? NO// YES
 Sending NEW Patient-Team Assignment Message

PCE (Patient Care Encounter) and EWL

If “Make Appointment” and “Cancel Appointment” protocols/options are on the PCE ListManager menu at your site, these Scheduling options contain Wait List routines and display Wait List messages and questions. These messages and questions display for all users who make and cancel appointments regardless of whether they have the SDWL Menu key.

NOTE: Sites that use a PCE ListManager menu for scheduling may want to add the three Wait List protocols/options, from the Appointment Management Menu, to the PCE ListManager menu. The three protocols/options listed below limit access with the SDWL Menu key.

WE (Wait List Enter/Edit)
DL (Inquire/Display Wait List) – for a patient
WD (Wait List Disposition)

For information on how to add protocols to a ListManager menu, the following website in the VistA Document Library provides documentation.

ListManager Developer’s Guide <http://vista.med.va.gov/listman/docs/hh/> ([link left for historical purposes](#))

Each site needs to decide who will use the Wait List software at their site and implement their decision(s) through site-specific procedures and training.

Electronic Wait List via PCMM GUI

A user can place a patient on a Wait List for a primary care team or position if that team or position is at or beyond its allotted capacity. This option applies to the GUI software. A patient is automatically dispositioned when they are placed on a PCMM team or position.

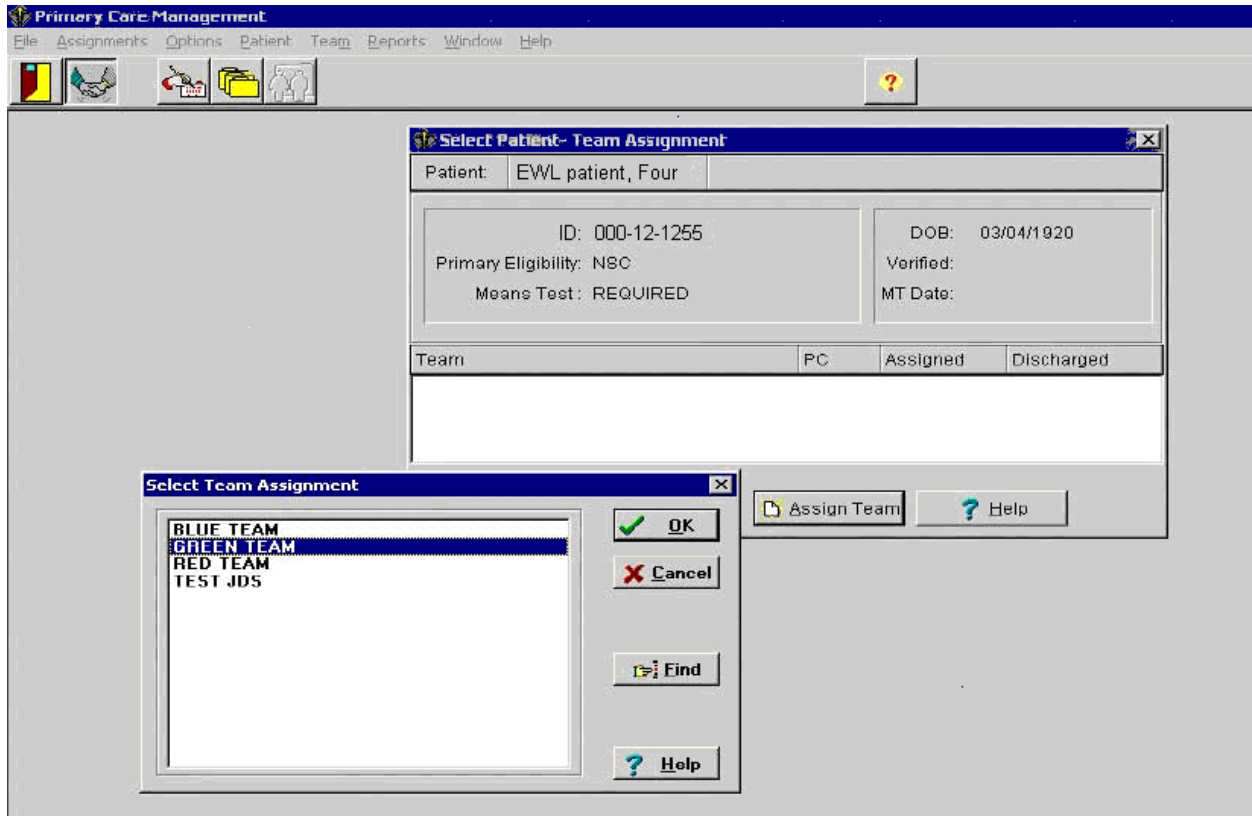

PCMM GUI

Note: The PCMM GUI will only allow a patient to be placed on the EWL when the selected PCMM Team is over capacity.

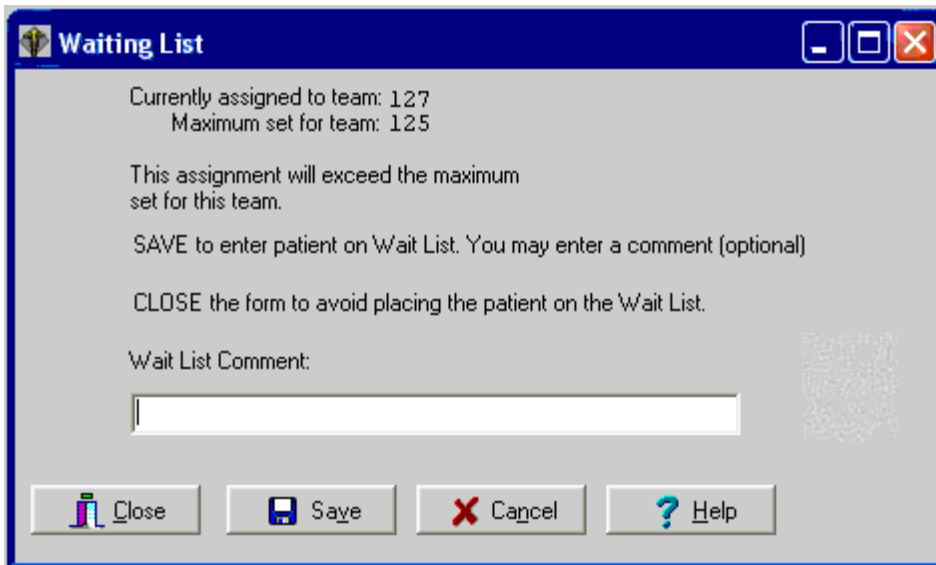

1. Select patient.
2. Select a PC team or position.
3. If the team or position is at or beyond its allotted capacity, the user is given the number of patients that are allowed for that team or position and the number that are currently assigned to it. The user is then asked if they would like to put the patient on a Wait List. If the user chooses to put a patient on the Wait List, the prompts are the same as in the standalone Wait List program. If the user chooses not to put the patient on the Wait List, the user may proceed to assign the patient on a team or position.

Screen Images of the PCMM GUI

This is an illustration of the PCMM GUI displaying patient information. Clicking the *Assign Team* button opens a window displaying the Teams

If the selected team is over the maximum capacity, the **Waiting List** window opens giving the user the opportunity to enter the patient on the wait list.

When a patient is assigned to a wait list the **Team Assignment** window will display the wait list assignment.

The screenshot shows a software window titled "Select Patient- Team Assignment". At the top, it displays "Patient: EWL patient, Four" and "ON WAITLIST TEAM: GREEN TEAM". Below this, patient information is organized into two columns: ID: 000-12-1255, Primary Eligibility: NSC, and Means Test: REQUIRED on the left; and DOB: 03/04/1920, Verified: (blank), and MT Date: SEP 13, 1995 on the right. A table below the patient info has columns for "Team", "PC", "Assigned", and "Discharged", but it is currently empty. At the bottom, there are four buttons: "Close", "Edit Team", "Assign Team", and "Help".

Team	PC	Assigned	Discharged
------	----	----------	------------

Wait List Utilities Menu

The Wait List (Sch/PCMM) Utilities menu allows users to:

- Request Inter-Facility Transfers
- Accept Inter-Facility Transfers
- Create new EWL entries for another clinic,
- Use the Wait List as a scheduling reminder
- Open closed EWL Entries

To access the Wait List (Sch/PCMM) Utilities menu, start with the Scheduling Manager's Menu and select Supervisor Menu.

```
Select Supervisor Menu Option: wait List (Sch/PCMM) Utilities
```

```
1      Inter-Facility Transfer Request
2      Inter-Facility Transfer Accept
3      Wait List Batch Clinic Change
4      Wait List Enter/Edit as a Scheduling Reminder
5      Open Closed EWL Entry
```

```
Select Wait List (Sch/PCMM) Utilities Option:
```

Inter-facility Transfer Request

To access the Wait List (Sch/PCMM) Utilities menu, start with the Scheduling Manager's Menu and select Supervisor Menu.

Select Supervisor Menu Option: wait List (Sch/PCMM) Utilities

- 1 Inter-Facility Transfer Request
- 2 Inter-Facility Transfer Accept
- 3 Wait List Batch Clinic Change
- 4 Wait List Enter/Edit as a Scheduling Reminder
- 5 Open Closed EWL Entry

Select Wait List (Sch/PCMM) Utilities Option:

New Request

The Inter-facility Transfer Request function is accessible from the Wait List (Sch/PCMM) Utilities menu option. The New Transfer (N) protocol is asking the user to make sure the patient is on an EWL list for a PCMM Team at their site before they enter a New Transfer for the patient.

R Remove
 Select Item(s): R//

The way this is treated depends on the status of the transfer. If the status is TRANSMITTED, the acknowledgement has not been returned from the receiving site or the original message may have failed to arrive. In this case, the record of the request is simply removed. If the status of the request is RECEIVED, a corresponding record will be held at the receiving site and a message will have to be sent to request its removal. Once this is sent and until an acknowledgement message is received to indicate that the request has been removed, the status will stay as CANCELLED.

If a request is removed that has arrived at the receiving site but where the acknowledgement has been delayed for some reason, there is a mechanism to automatically send a removal message back when the acknowledgement is eventually returned. This will prevent a possible file mismatch at the two sites.

Display Inactive Entries

Inactive entries are those requests that have reached resolution through acceptance or rejection at the receiving site. They have a status of REFUSED or ACCEPTED and are not displayed on the main summary screen. A summary of these entries can be displayed by entering “D” at the action prompt of the Transfer Request function main summary screen.

```

A  Accept          P  Print Coversheet          R  Reject
Select Item(s): Quit//

```

This is the screen from where all other actions take place on this request. The request may be rejected or accepted, or the print of a coversheet may be requested. The coversheet must be requested before acceptance is made as the request entry is removed after that.

To reject the request, “R” is entered at the action prompt and the user is returned to the previous screen.

To print the coversheet, “P” is entered at the action prompt. The output device is entered at the next prompt and the coversheet is printed.

```

DEVICE: HOME//

```

To accept the transfer for this function, the details should be entered on the system as a new EWL entry or scheduled appointment and the details printed out to refer to. Having done that, "A" is entered at the action prompt for this screen. Following that a confirmation prompt appears to emphasize the need to enter the details before the record is removed.

Do you confirm that the appropriate action was taken to schedule this patient
for an appointment or she/he has EWL entry and the cover sheet has been printed?
? N//

When this statement is confirmed, the details are resolved and the user is returned to the previous screen.

Once a request has been either rejected or accepted, an acknowledgement message is returned to the requesting site which will trigger notification messages to the administration mail group there. If the result was accepted, the EWL entry at the requesting site will be closed with a disposition reason, new for this function, of TR – TRANSFERRED.

Wait List Batch Clinic Change

This option allows all the patients on one Clinic's Wait list to be transferred to another Clinic's Wait List. Provide the name or number of the Source Institution and Source Clinic as well as the name or number of the Destination Clinic and Destination Institution.

Scheduling/PCMM Enter/Edit Wait List

Select PATIENT NAME: <Enter the patient's name and continue the process for adding the patient to the Wait List.>

Wait List Import Tool

Sites that currently keep waiting lists are able to import their lists into the EWL via the Wait List Import Tool. This utility imports local Wait List entries into the EWL.

NOTE. Specific Clinics and Service/Specialties must be set up for each Institution/Division before Importing Wait List entries with the Import Tool.

Using the Wait List Import Tool

To use the Wait List Import Tool sites must convert their Wait List from its current format into a comma delimited text file (.txt). This is the expected format for the tool. This file is called the Import file. The Import file can be created from Vista using FileMan's DATA EXPORT TO FOREIGN FORMAT options or from Excel using the CSV format. This text file must contain four fields.

- Social security number (SSN) (Entered as xxxxxxxxx or xxx-xx-xxxx)
- Institution Name (The name of the Institution from file 4)
- Clinic Type {this numeric field is numbered 1-4, with 1 being file 404.51 (Team), 2 being file 404.57 (Team Position), 3 being file 409.31 (SD WL Service/Specialty), and 4 being file 409.32 (SD WL Clinic Location)}
- Clinic Type Modifier {a specific choice within one of the clinic types. For example, if clinic type 1 (Team) were chosen, the modifier would be a specific team.} \
- Desired Date (Entered as the FileMan acceptable date. This is date for which the appointment is being requested. Applies only to Clinic Types 3 and 4.) (Note: If the desired date is requested then the priority is set to future and a date is automatically plugged in. If there is no desired date than the priority is set to ASAP, and the date the file is imported is automatically entered.)

Note: If there is no value for a field then a null value is entered (""). One row of five fields defines a single record for entry into the Electronic Wait List.

Example #1

Values are submitted for all fields

FIELDS

1 2 3 4 5

"123456789","VA","1","CLINIC","01/12/2003"

Example #2

No value is submitted for field 5.

A null ("") is entered this field position.

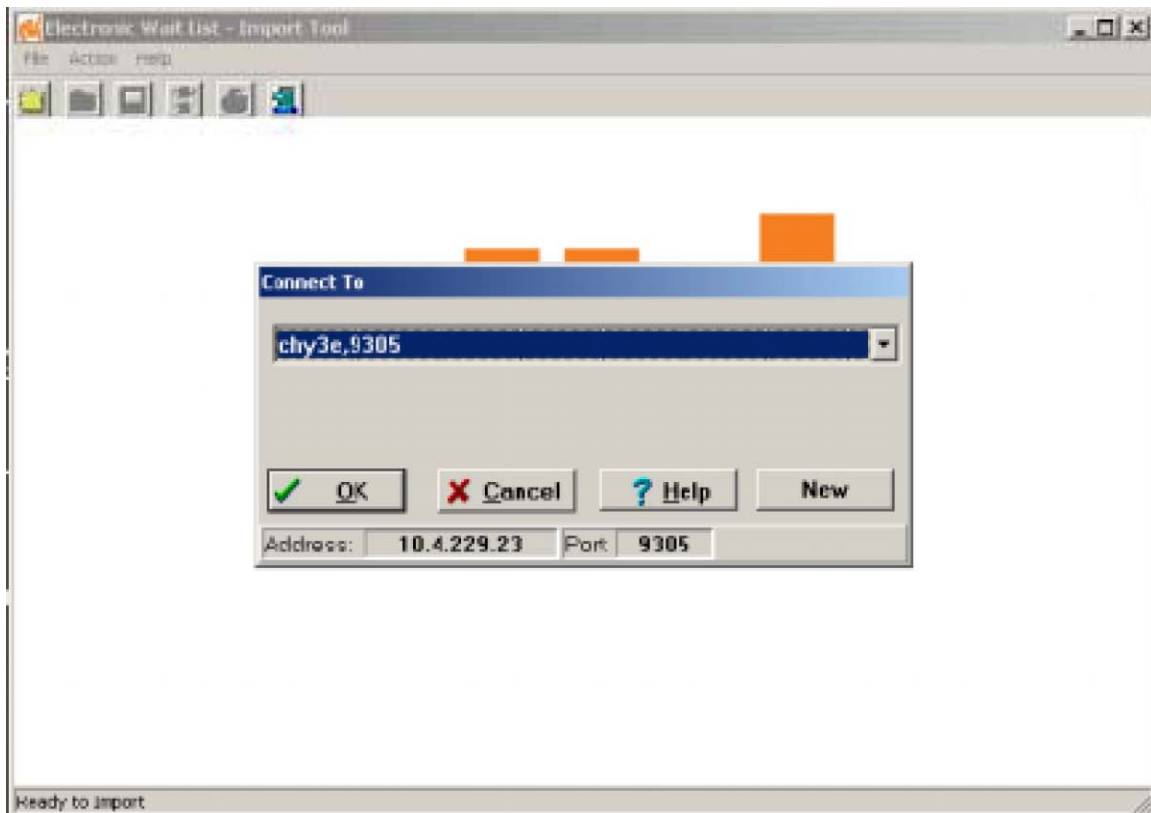

FIELDS

1 2 3 4 5

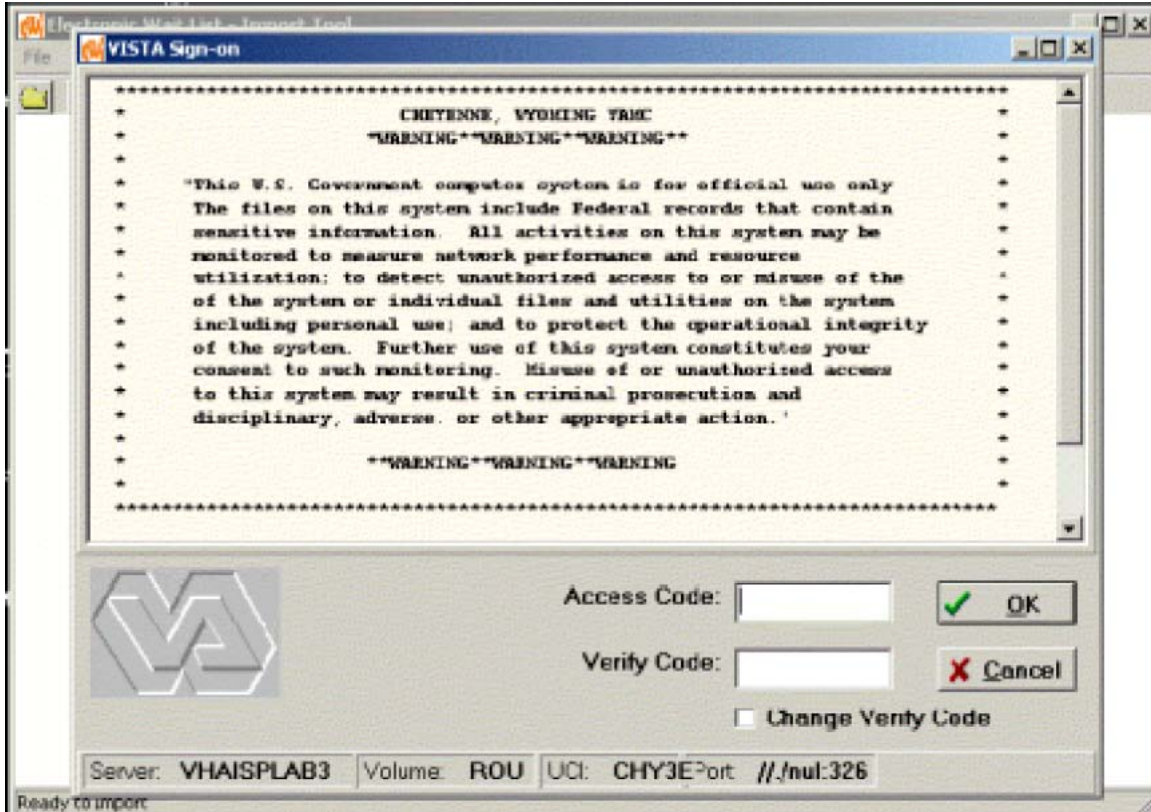

"123456789","VA","1","CLINIC",""

Using the EWL Software

1. Select a server or add a new IP address for the server. Log on to Vista.
2. Click on FILE, then OPEN or click the open folder icon on the toolbar.

3. Log on to Vista.

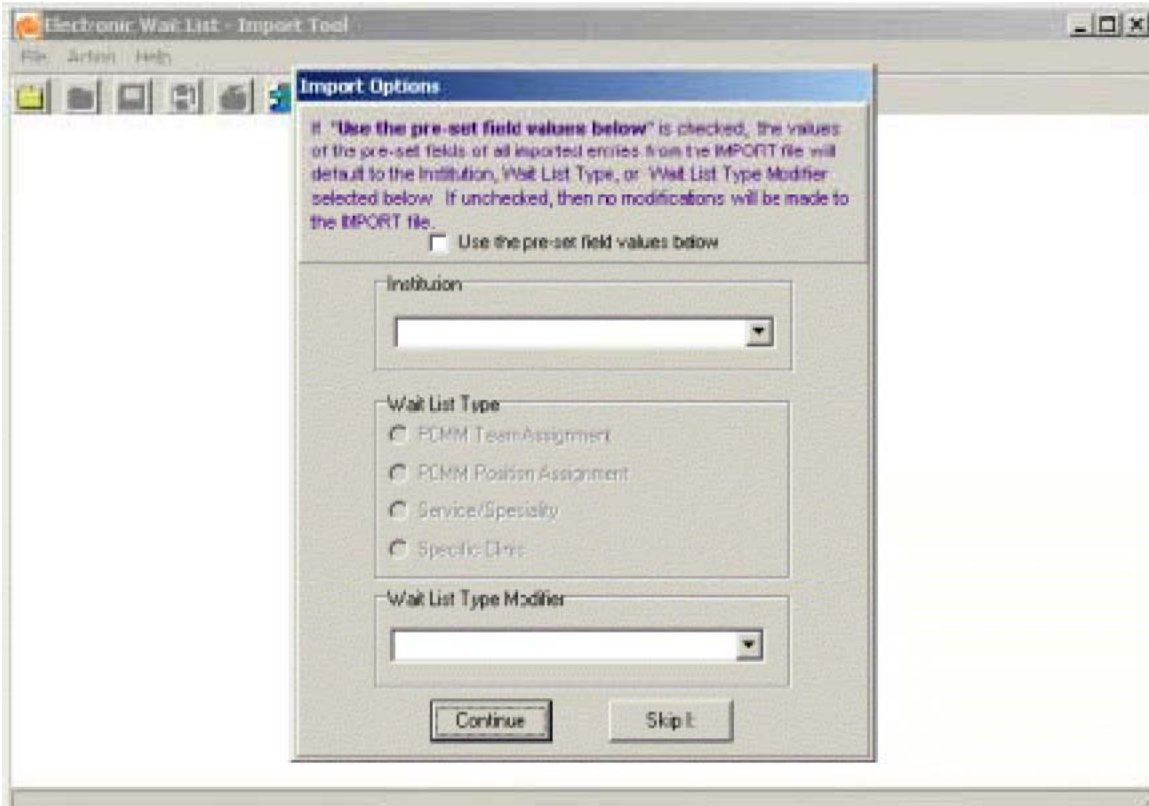

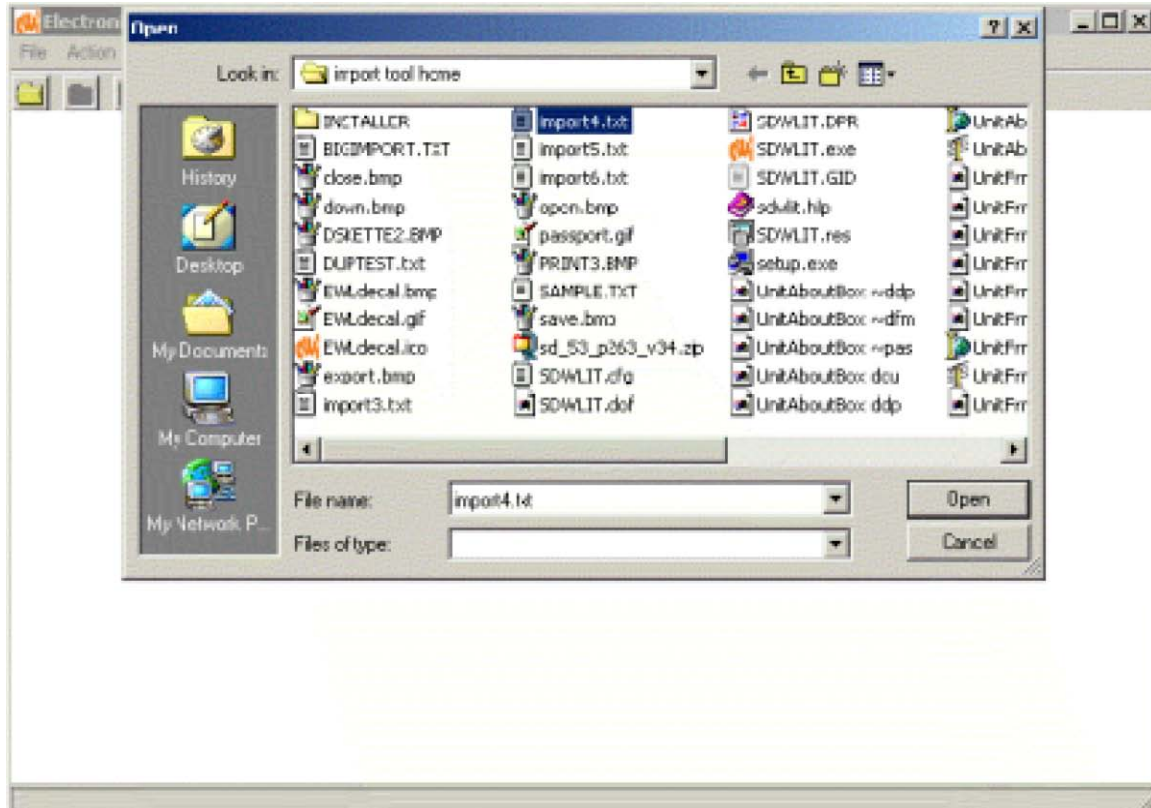

4. Click on FILE then OPEN or click the open folder icon on the toolbar.

5. Select Import Options. Checking **Pre-set Field Values** pre-sets the **Institution**, **Wait List Type**, or **Wait List Type Modifiers** to the values the user selects and overwrites the values found for those fields in the **IMPORT FILE**. If the user leaves **Pre-set Field Values** unchecked, no changes are made to the **IMPORT file**. Click **CONTINUE** to accept the pre-set values or **SKIP IT** to cancel using pre-set values.

6. Select the **IMPORT** file.

7. The IMPORT file displays in the grid. Entries can be reviewed or edited. To edit slowly, click twice in the field to be edited.

When ready click ACTION, then click IMPORT TO EWL or click the import icon.

PATIENT	INSTITUTION	TYPE	TYPE MODIFIER	DESIRED DATE	IMPORT STATUS
000-64-6763	BAY PINES, FL	1	BLUE TEAM ALPHA		
000-09-1514	BAY PINES, FL	1	BLUE TEAM ALPHA		
666-44-6363	BAY PINES, FL	1	BLUE TEAM ALPHA

000-38-0085	BAY PINES, FL	1	BLUE TEAM ALPHA		
000-24-6954	BAY PINES, FL	1	BLUE TEAM ALPHA		
000-12-2224	BAY PINES, FL	1	BLUE TEAM ALPHA		

Each row of the grid is submitted to EWL as a new record. If the record is validated and accepted by EWL, the successful addition is noted at the bottom of the screen. If EWL cannot validate the record, the reason for the failure is noted in the IMPORT STATUS column of the grid, e.g., duplicate entry. To sort on a field, click on the column heading for that field, e.g., sort on Import Status.

The rows of failed imports can be reviewed and edited and the import action can be repeated.

Transmission to National Patient Care Database in Austin

This functionality is now accomplished by CDW/VSSC. Patch SD*5.3*638, DISABLE EWL TRANSMISSION OPTION, update. Removed contents of “Transmission to National Patient Care Database in Austin” section. Data is now retrieved from the Corporate Data Warehouse (CDW) effective 10/1/2014.

Glossary

AAC	Austin Automation Center -The central repository for National Care Patient Care Database.
ADPAC	Automated Data Processing Applications Coordinator
Appointment	A meeting with a provider in a clinic; currently an appointment is entered for the clinic, and it may be scheduled in the future or entered in the past as already kept.
Austin Automation Center	The central repository for National Care Patient Care Database located in Austin, Texas.
Clerk	This person is a clerk who performs data entry.
Clinical Services	A service defined at the Medical Center level, for example, Medicine, Surgery, Primary Care
Closing	Another term for 'inactivating' a position or team.
Consults	When a patient is referred to a clinic on a one-time basis, he/she is not normally enrolled in that clinic.
Database	This refers to the information that is stored in your medical center's computer program, e.g., patient information, service information, clinic information, etc.
Disposition/Close EWL Entry	Changing the Current Status field of EWL entry from 'open' to 'closed'. There are several coded reasons, identified by the Disposition field of the SD WAIT LIST file.
DSS	Decision Support System
E-Mail Messages	These are the messages that are generated by a software event that delivers information to designated users via MailMan. E-mail messages in the PCMM module would include information about death notifications, inpatient movements; consult notifications, and team notifications or changes.
EWL	Electronic Wait List – VistA software package designed for recording, tracking and reporting veterans unable to acquire appropriate appointments within a specific VA medical center. The EWL may be used as a tool to avoid pre-scheduling clinics until the appropriate return interval, for example to track return appointment times for Advanced Clinic Access
HL7	Health Level 7 - ANSI standard for electronic data exchange in healthcare environments.
IRM	Information Resources Management
MAKE APPOINTMENT	A scheduling option which provides users the ability to schedule veterans for specific clinic appointments. This option also allows veterans to be placed on the Electronic Wait List if no appointment meets the veteran appointment criteria.

MD- PHYSICIAN- PRIMARY CARE	As a physician, incumbent's duties are to advise on, administer, supervise, or perform professional and scientific work in one or more fields of medicine. The degree of Doctor of Medicine or Doctor of Osteopathy is a fundamental requirement, along with a current license to practice medicine and surgery in a US State, territory or the District of Columbia. As a Primary Care practitioner, the incumbent provides the first point of assistance for a patient seeking care. Primary Care duties include: (1) Intake and initial needs assessment, (2) Health promotion and disease prevention, (3) Management of acute and chronic biopsychosocial conditions, (4) Access to other components of health care, (5) Continuity, and (6) Patient and non-professional care giver education & training. (from IL 10-93-031, Under Secretary for Health's Letter) Can act as Primary Care Practitioner.
MODULE	A portion of a major software package, e.g. Primary Care functionality is considered a MODULE of the Scheduling package.
NPCD	National Patient Care Database - is maintained in Austin and receives selected demographic and encounter-based clinical, diagnostic data from VA medical centers. This data enables a detailed analysis of VHA inpatient and outpatient health care activity.
OTHER	A general classification for those team members who do not belong in any of the listed Standard Position entries.
PA	Physician's Assistant
PANEL	A panel is a group of individual patients for which the Primary Care Provider has accepted primary care responsibility.
PATIENT PANEL	Group of individual patients assigned to Team/Position/ Practitioner. Can be either Primary Care or Non Primary Care patients; e.g., the Practitioner's Patients Report includes both Primary Care and Non Primary Care patients assigned to the practitioner in the Patient Panel Count.
PC	Primary care is the provision of integrated, accessible health care services by clinicians that are accountable for addressing a large majority of personal health care needs.
PC Coordinator	Primary Care Coordinator
PCMM	Primary Care Management Module - is the application for VA facilities to use for implementing primary care teams. Teams are created, positions associated with the teams are created, staff members are assigned to positions, and patients are assigned to the teams and positions.

PCP	Primary Care Provider - In PCMM, the Primary Care Provider is the position determined to be responsible for the coordination of the patient's primary care.
PHYSICIAN-PRIMARY CARE	As a physician, incumbent's duties are to advise on, administer, supervise, or perform professional and scientific work in one or more fields of medicine. The degree of Doctor of Medicine or Doctor of Osteopathy is a fundamental requirement, along with a current license to practice medicine and surgery in a US State, territory or the District of Columbia. As a Primary Care practitioner, the incumbent provides the first point of assistance for a patient seeking care. Primary Care duties include: (1) Intake and initial needs assessment, (2) Health promotion and disease prevention, (3) Management of acute and chronic biopsychosocial conditions, (4) Access to other components of health care, (5) Continuity, and (6) Patient and non-professional care giver education & training. (from IL 10-93-031, Under Secretary for Health's Letter) Can act as Primary Care Practitioner.
PIMS	Patient Information Management System
Position	Teams are comprised of one or more staff positions. Individual practitioners are assigned to a team position. A position is designated to serve certain roles in the overall primary care setting.
Preceptor	Physician responsible for providing the overall care for patients assigned to an Associate Provider or Medical Student. On Primary Care Teams the Preceptor must be able to provide Primary Care.
Primary Care.	Primary care is the provision of integrated, accessible health care services by clinicians that are accountable for addressing a large majority of personal health care needs.
Primary Care Management Module (PCMM)	Primary Care Management Module is the application for VA facilities to use for implementing primary care teams. Teams are created, positions associated with the teams are created, staff members are assigned to positions, and patients are assigned to the teams and positions.
Primary Care Provider (PCP)	In PCMM, the Primary Care Provider is the position determined to be responsible for the coordination of the patient's primary care.
Role	A function or task of a staff member involved with the implementation, maintenance and continued success of primary care.
SA: Removed/Scheduled-Assigned	One of reasons for disposition of open EWL entry. If this reason is selected the field related to corresponding appointment are filed into the EWL entry.

SC	Service Connected
Service Connected	With respect to a condition or disability, the VA has determined that the condition or disability was incurred in or aggravated by military service.
SD	Refers to VistA's Scheduling Package
SD EWL Background Update	EWL Mail Group used for different kinds of notifications.
SPECIALTY CLINICS	A set of clinics that are defined as SUBSETS of generalized Service clinics such as Cardiology (specialty of Medicine); Orthopedics (specialty of Surgery), etc.
STOP CODE	Treatment code used for reporting procedure performed during veterans visit.
TEAM	Teams are groups of staff members organized for a certain purpose (e.g., Primary Care).
TEAM PROFILE	This is a screen within PCMM that shows the various characteristics of a particular team, e.g., number of patients allowed for enrollment, name, positions assigned, etc.
UNIQUE PATIENT (UNIQUES)	For PCMM Primary Care, unique patients are defined as the individual veteran (patient) enrolled in VA health care that make up the primary care provider's panel.
VA	Veterans Admission
VHA	Veterans Health Administration
VistA	Veterans Health Information Systems and Technology Architecture, formerly known as Decentralized Hospital Computer Program, encompasses the complete information environment at VA medical facilities.

Appendix A - Patch SD*5.3*420 - EWL Transmission Fields

This functionality is now accomplished by CDW/VSSC. Patch SD*5.3*638, DISABLE EWL TRANSMISSION OPTION, update. Removed contents of “Transmission to National Patient Care Database in Austin” section. Data is now retrieved from the Corporate Data Warehouse (CDW) effective 10/1/2014.

The following fields in file SD WAIT LIST (#409.3) were added to SD Wait List Trans to AAC [SD WAIT LIST TRANS TO AAC] option.

FIELD NUMBER	FIELD NAME
13	SCHEDULED DATE OF APPT
13.1	DATE APPT. MADE
13.2	APPT CLINIC
13.3	APPT INSTITUTION
13.4	APPT STOP CODE
13.5	APPT CREDIT STOP CODE
13.6	APPT STATION NUMBER
13.7	APPT CLERK
13.8	APPT STATUS
14	SERVICE CONNECTED PERCENTAGE
15	SERVICE CONNECTED PRIORITY
29	REOPEN REASON
30	REOPEN COMMENT

PATCH SD*5.3*420 data types for new fields.

SCHEDULED DATE OF APPT - Date/time in FileMan format
 DATE APPT. MADE - Date in FileMan format
 APPT CLINIC - Pointer to file 44
 APPT INSTITUTION - Pointer to file 4
 APPT STOP CODE - Pointer to file 40.7
 APPT CREDIT STOP CODE - Pointer to file 40.7
 APPT STATION NUMBER - Free text 3-6 characters
 APPT CLERK - Pointer to file 200
 APPT STATUS - Set of codes
 R = Scheduled/Kept
 'I' = Inpatient
 NS = No-Show
 NSR = No-Show, Rescheduled
 CP = Canceled by Patient
 CPR = Canceled by Patient, Rescheduled
 CC = Canceled by Clinic
 CCR = Canceled by Clinic, Rescheduled
 NT = No Action Taken
 SERVICE CONNECTED PERCENTAGE - Number between 0 and 100
 SERVICE CONNECTED PRIORITY - Set of codes
 0 = NO
 1 = YES
 REOPEN REASON - Set of codes

Appendix A

CC = INACTIVATED CLINIC
CA = CANCELED APPOINTMENT
DE = DATE OF DEATH ERROR
O = OTHER

REOPEN COMMENT - Free text 3-72 characters.

This field is already transmitted; a new code was added to the set DISPOSITION – Set of codes.

D = DEATH
NC = REMOVED/NON-VA CARE
SA = REMOVED/SCHEDULED-ASSIGNED
CC = REMOVED/VA CONTRACT CARE
NN = REMOVED/NO LONGER NECESSARY
ER = ENTERED IN ERROR
TR = TRANSFERRED

START WITH ORIGINATING DATE: Jan 1,2006// (JAN 01, 2006)

GO TO ORIGINATING DATE: Jan 1,2007// (JAN 01, 2007)

DEVICE: ;132; UCX/TELNET

EWL Wait Time Statistics

The following fields from file SD WAIT LIST (#409.3) are included in this report.

Originating Date
 Scheduling Date of Appt
 Date Appt Made
 Date of Disposition
 Desired Date of Appointment

The following fields are computed calculations included in the report.

Refer to the following report key to translate field values:

a = Scheduled Date of Appt - Originating Date
 b = Desired Date of Appointment - Originating Date
 c = Desired Date of Appointment - Scheduled Date of Appt
 d = Date of Disposition - Originating Date
 e = Originating Date - Date Appt Made
